FOREWORD

This hand-list of the writings of Thomas Taylor, "the Platonist" (1758-1835) has been prepared for use in connection with the reference work of the Library, since many lines of investigation in the fields of Philosophy, English Literature, and the Classics are found to cross or to approach his varied activities. As no complete bibliography of Taylor's publications is known to exist, it seemed desirable to compile the present list as an aid to students whose studies in the Library required access to and knowledge of the life and works of this well known English Platonist. Every effort has been made to make the list as complete as possible.

The works are arranged in chronological order. The original works of each year are followed by edited works and translations. The titles of works now in The Newberry Library are designated by their respective "call-numbers". Those not in the Library are indicated by references to the authorities whence a knowledge of them was derived. A key to the abbreviations used for these authorities will be found at the end of the list.
